Milestones for Placement Portal App - Modern Applicati... Updated automatically every 5 minutes

Milestones for Placement Portal Application

Modern Application Development I

Project: Placement Portal Application (MAD-I)

- The project is divided into **0th milestone**, **Core Requirements (6 Milestones)**, and **Recommended Functionalities & Optional Enhancements (5 Milestones)**.
- **All core milestones can be completed in any order.**
- Recommended and optional enhancements should only be started after the core milestones are done.
- Each milestone includes a Git commit message. When completed, use the provided commit message and push your updates to GitHub.

Milestones for Placement Portal App - Modern Applicati... Updated automatically every 5 minutes

✅ **Expected Time:** 1 day
📊 **Completion Progress:** 5%

- Create a private GitHub repository.
- Add a `README.md` with a short project description.
- Set up `.gitignore` to exclude unnecessary files, if required. (not compulsory).
- Commit and push the initial setup to the repository.
- Refer to the git tracker document to add **MADI-cs2003** as your collaborator, so that we can track your project.
- Github Adding Collaborator Video: Adding Github Collaborator using VSCode and WSL
- This milestone needs to be completed by 10th March 2026.

Git Commit Message: `Milestone-0 PPA-MAD-1`

Milestone: Database Models and Schema Setup

✅ **Expected Time:** 5–7 days
📊 **Completion Progress:** 18%

- Create models/tables for **Admin (predefined), Company, Student/JobSeeker, Job Position, Application, and Placement**, any other if you need. Use SQLite DB Only.
- Define relationships between tables (e.g., Company–Job Position, Student–Application, Application–Placement).
- Ensure the database is programmatically created via a Python script/model code (no manual DB browser creation).

Git Commit Message: `Milestone-PPA DB-Relationship`

Milestone: Authentication and Role-Based Access

✅ **Expected Time:** 5 days
📊 **Completion Progress:** 10%

- Implement **Student and Company registration and login.**

Submission

✅ **Expected Time:** 2 days
📊 **After Completion Progress: 100%**

- Submit **ZIP with code + 3–5 page report**.
- Submit a 3-10 minute demo video (Google Drive with access to **anyone with the link**).
- Include a **video link in the report**.
- Include a **declaration of AI usage %** in the same pdf report (**if used or not declaration is mandatory**).
- Use this video How to Submit App Dev 1 & 2 Projects | Full Submission Guide + Viva Workflow | IITM BS on how to submit the app in the portal.

Git Commit Message: `Milestone-PPA Final-Submission`

Tracking Progress

To track progress, you should:

1. **Use Git commits** for each milestone.

Final Submission Overview

Milestone	Average Time Estimate
Final Project Submission Details	2 days

Note:

1. *Time estimates are averages. Spend time as needed, to understand and complete each milestone. Completing Milestone 0 and 6 core requirements are taken for grading in Viva1. After completing the core requirements, there are 5 additional milestones for enhancements. These enhancements are not graded but can be completed for improved functionality or to be considered for the Best Course Project nomination.*

2. *Students can complete the core milestones in any order as per their approach to doing the project. They need not follow the same sequence as they appear in this document.*

3. *Students can have any number of commits in their project repository, but for a milestone to be considered as "complete", the student must make a commit with the*
